Launch of "That Plastics Guy" discussion group on Linked-in.

FIRST-TIME PODCAST GUESTS:

Dharmendra Khanolkar (DK)
Bindi Patel

Engage with us on LinkedIn - "That Plastics Guy"

In the February Newsletter, the podcast "**THAT PLASTICS GUY**" was unveiled as your go-to source for all things plastic. Hosted by the President of Simcoe Plastics Ltd., Kurt Stahle (a.k.a. "**That Plastics Guy**"), 8 episodes are live and available on all major podcast platforms.

This month, we invite you to join our LinkedIn discussion group for "**That Plastics Guy**" where Kurt engages with members about topics explored in the podcast.

Is there a topic you would like discussed in the podcast or do you have an idea for a podcast guest? Join the group to connect with Kurt! Share your thoughts, questions and ideas and enjoy being part of a community where there is a passion for polymers!

First-time Guests on “That Plastics Guy”

DHARMENDRA KHANOLKAR (DK)
CEO & Executive Director - Business Development
Excista Corporation

Silaplast – The Additive You Need NOW!

What makes silaplast so unique - find out on episode 7 of “That Plastics Guy”!

Kurt Stahle interviews Dharmendra Khanolkar (DK), CEO and Director of Excista Corporation, to find out what makes silaplast the FDA-approved thermoplastic additive manufacturers should not be without.

In this episode, DK highlights the many benefits of silaplast; improved processing cycle times, smoothness of product surface and scratch and abrasion resistance of the surface. Kurt and DK also consider the many molding applications silaplast can be extremely beneficial to and used for, including medical-grade molding.

DK guarantees that silaplast will provide noticeable improvements in various thermoplastic processing applications without additional capital equipment.

Is silaplast the one slip additive you need? Tune in to “That Plastics Guy” and find out!

Water-Soluble Resins, the ECorrEct Way!

The innovative product development of Bindi Patel, founder and director of ECorrEct Pvt. Ltd., takes us one step further to a sustainable future.

Bindi was featured in episode 8 of “That Plastics Guy” as the second podcast guest. In this episode, Kurt and Bindi discuss what inspired the development of the ECorrEct water-soluble resins.

Having witnessed a significant amount of solid waste in the form of plastic, Bindi developed an environmentally friendly product, targeted at the film and packaging market. The groundbreaking sustainable feature of this product is that it provides plastic-like properties, but it is completely biodegradable in soil and marine.

Bindi elaborates that ECorrEct’s water-soluble granules are compatible with existing machines, without modifications to produce carry bags.

For more insight into the sustainability efforts of ECorrEct, tune in to Episode 8 of “That Plastics Guy”!

BINDI PATEL
Founder & Director
ECorrEct Pvt. Ltd.
